Professional Summary

MERN Stack Developer with strong foundation in Data Structures & Algorithms, building scalable full-stack applications, automation systems, and real-time platforms with optimized performance and clean user interfaces.

Skills

Programming

- C++
- Python
- JavaScript

Tools

- HTML5
- CSS
- React
- Tailwind
- NodeJS
- Express
- MongoDB

Skill

- DSA
- Problem-Solving
- Leadership
- Goal-oriented
- Hard-working

Education

B.Tech

2027-08

St. Andrews Institute of Technology & Management • Gurgaon, Haryana, India

GPA: 8.2

Projects

Robots.txt Analyzer

Technologies: React,Tailwind,Express,MongoDB

Built a full-stack application to fetch and analyze robots.txt files, extracting user-agents, allowed/disallowed paths, and sitemap links, helping understand website crawling rules and SEO behavior through structured visualization.

Student Result Automation System

Technologies: Python,selenium

Developed an automated system to extract and process student results, generating dynamic rank lists using efficient sorting algorithms, and presenting insights through a clean interface for performance evaluation.

Multilingual Chatting App

Technologies: React,Tailwind,express,Python

Created a real-time chat platform with automatic message translation, enabling users to communicate across different languages seamlessly using APIs and scalable backend architecture.

Game-Zone

Technologies: HTML5,CSS,JavaScript

Designed a browser-based mini gaming platform focusing on performance optimization, smooth gameplay, and responsive design using core web technologies like HTML, CSS, and JavaScript.
