

Krishan Gopal

Engineering Student

krishann01g@gmail.com 9773710341 Delhi, India

PROFESSIONAL SUMMARY

MERN Stack Developer with strong foundation in Data Structures & Algorithms, building scalable full-stack applications, automation systems, and real-time platforms with optimized performance and clean user interfaces.

PROJECTS

Robots.txt Analyzer

React,Tailwind,Express,MongoDB

Built a full-stack application to fetch and analyze robots.txt files, extracting user-agents, allowed/disallowed paths, and sitemap links, helping understand website crawling rules and SEO behavior through structured visualization.

Student Result Automation System

Python,selenium

Developed an automated system to extract and process student results, generating dynamic rank lists using efficient sorting algorithms, and presenting insights through a clean interface for performance evaluation.

GitHub: <https://github.com/KrishanGopal23/Result-Automation>

Multilingual Chatting App

React,Tailwind,express,Python

Created a real-time chat platform with automatic message translation, enabling users to communicate across different languages seamlessly using APIs and scalable backend architecture.

Game-Zone

HTML5,CSS,JavaScript

Designed a browser-based mini gaming platform focusing on performance optimization, smooth gameplay, and responsive design using core web technologies like HTML, CSS, and JavaScript.

EDUCATION

B.Tech

St. Andrews Institute of Technology & Management

Gurgaon, Haryana, India | 2027-08

GPA: 8.2

SKILLS

Programming

C++ Python JavaScript

Tools

HTML5 CSS React Tailwind
NodeJS Express MongoDB

Skill

DSA Problem-Solving Leadership
Goal-oriented Hard-working
